

Non-slip Wood-Compo

SCREWDRIVER SET

The wood powder in the resin works to prevent slipping and creates a non-slipping effect even when hands are greasy. Enjoy the smell and warmth of wood of this screwdriver.

The wood powder in the resin creates a non-slipping effect even when hands are greasy.

New!

High-precision magnetic tip.

Fully hardened chrome-vanadium steel

Biomass grip is a combination of wood powder and resin.

Even with oily or greasy hands, you only lose about 3% of torque!

WOODCOMPO is perfect for working where grease is present such as car maintenance and ironwork. It can also be used for electric work, electronic assembly work, woodworking and DIY applications.

Molding "wood resin" containing 70% wood and 30% plastic, and utilizing uniquely developed technologies.
