

MEGADORA

SCREWDRIVER SET

Even if you have a power impact tool, you need a MEGADORA impact driver in your toolbox! Easily remove rusted or stuck screws.

Fully hardened chrome-vanadium steel, with knurl for quick turning.

The jaws fit machining ensures accurate fastening with no coming out. Magnetic.

The flat surface design features elastomer at each angle of the hexagon to reduce the load on the palm and ensure easy fastening.

Suitable for a variety of screws from metal screws to wood screws, and especially for car repairs as well as electric work, electronics assembly and general applications.

MEGADORA IMPACTA

12°

When the metal end-cap is tapped with a hammer, the shank instantly turns counter-clockwise by 12°. The impact acceleration is applied on the tip, so screws stuck with rust or paint can be loosened. MEGADORA impacta is effective even for screws with crushed heads.

Not suitable for soft material since the component could get damaged.

HANGER CASE SET

EDP. CD 122501
