

NEW BIT MAGNETIZER/DEMAGNETIZER No.NMC-2P

Dear customers,

VESSEL is proud to introduce you with its new innovative tool, the NMC-2P.

Challenging your fastening problems, this new bit magnetizer/demagnetizer is ideal to strongly maintain the screws onto your driving bits thanks to a strong magnetic force.

Because of its design, the NMC decreases vibrations during impact working, and increases concentricity of your fastening. Thus, the quality and the precision of your work will be better.

This magnetizer can be used on any bit and for many different applications such as tightening screws in a confined area and performing continuous work for interior finishing carpentry work, furniture assembly, woodwork, concrete panel installation, board and drywall work, equipment, electrical work, etc.
