PAT.

World's first

**Wood-Plastic
Composite Grip Model**

**offers such non-slip experience
as you have not had before!**

Closeup picture of
the grip surface

**Secure working
efficiency even with
oily hands**

**Most Reliable
Non-Slip Grip Model!**

The rough surface that is produced by the wood powders
assures beneficial non-slip effect.

Wood-Compo Screwdriver

New

The shank is made of fully hardened chrome vanadium steel and finished with black chrome plating.

Such non-slip screwdriver not available before!

Maintenance for cars, motorcycles, and machines, inevitably comes with oil. With such non-slip Wood-Compo Screwdrivers, you can feel the efficient torque transmission when tightening screws. This is because the rough surface which is made by wood powder contained in the grip stops the oil flux.

Tightening force is almost the same even under oily condition!

Wood-Plastic Composite

The grip part is formed by the mold injection of a "wood resin", which contains a combination of 70% wood and 30% plastic, utilizing uniquely developed technologies. The product offers to the users such texture and comfort as the natural wood materials.

No. 300 Wood-Compo Screwdriver
